

Is this where your payroll is going?

This is George. He works for you.

Well, he works for you when he isn't checking his home email, discussing last night's game with his co-workers, or leaving early to pick up his dry cleaning.

A 2005 survey by AOL revealed that American workers waste over two hours a day—that's 20%—on the job. The job that you're paying them to do.

Freelancers aren't employees. That means you don't have to pay for our pensions. Pay for our health insurance. Pay for that desk space where George is resting his size twelves. You pay for a job to get done, and we do it. 100% of the time.

Call 800-244-5933 the next time you need some actual work done. We can pick up our dry cleaning later.
